GLOBAL ANTISEMITISM FOCAL POINTS

Antisemitism Spikes Worldwide During Hanukkah, Driven by Public Menorah Desecrations

The eight-day Jewish holiday of Hanukkah has been accompanied by a spike of antisemitic incidents in recent years. The high visibility of the "Festival of Lights," with menorahs on display in prominent open locations and the windows of private homes, provides an easily-accessible, target-rich environment. The CAM Information Hub monitored 17 reports of antisemitic incidents specifically tied to public menorah displays or other Hanukkah celebrations.

Series of High-Profile Antisemitic Incidents Sweep Across Southwestern United States

Recent weeks saw a troubling string of antisemitic incidents across the southwestern United States, largely in Texas and Arizona. The epicenter of this antisemitic outburst was in Austin, culminating with an arson at a Reform synagogue, for which an 18-year-old Neo-Nazi suspect was arrested on November 10th.

Vienna Forum Focuses on Fight Against Antisemitism in Sports
